AntHome manual

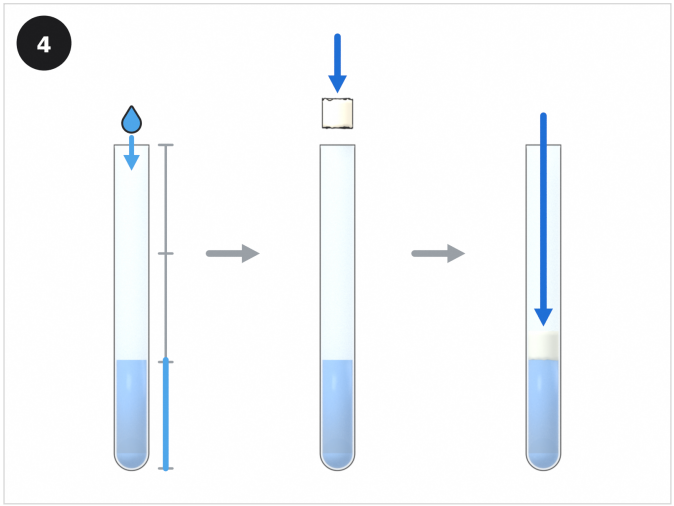

1 In the box: AntHome, test tube, cotton wool, test tube adapter. Ants not included.

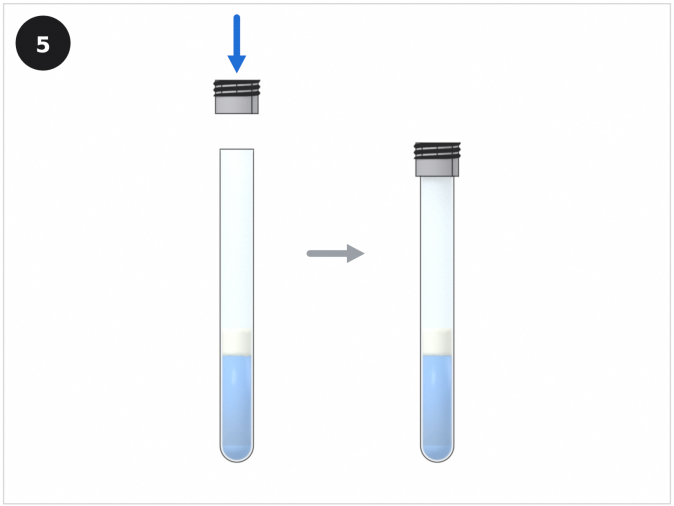

2 Flat, steady surface indoors. Away from sun and heat.

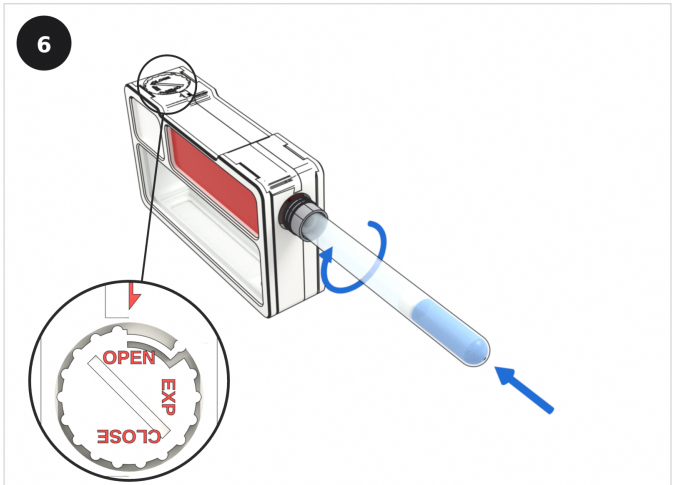

3 Wash your hands.

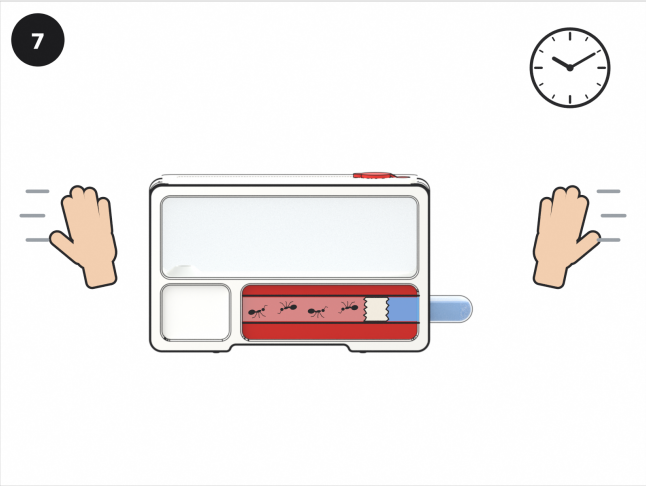

4 Fill the tube one third with water. Push in wet cotton wool.

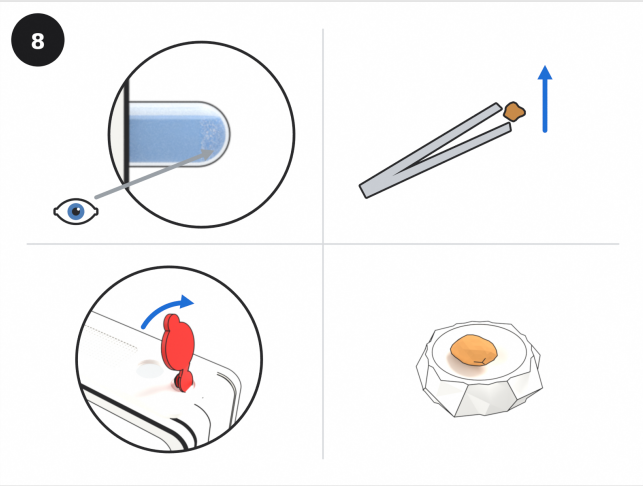

5 Push the open end of the tube firmly into the adapter.

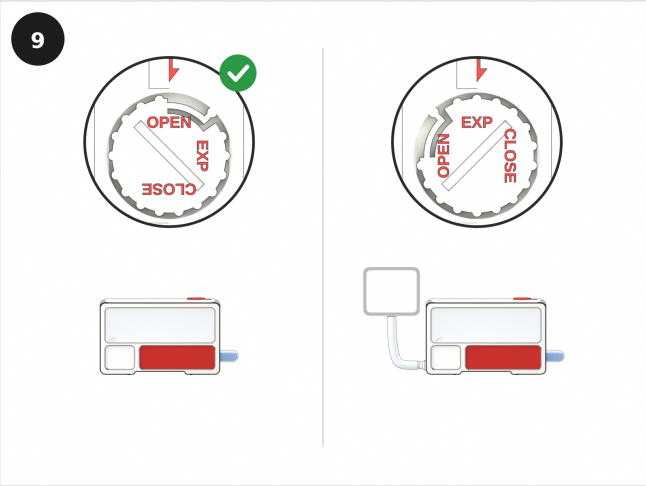

6 Screw the tube in clockwise, gently. Knob stays at OPEN.

7 Colony in. Hands off: leave them to settle before touching.

8 See the water in the tube end. Feed tiny amounts. Remove leftovers.

9 Knob stays at OPEN. EXP: joining a nest or changing the tube.

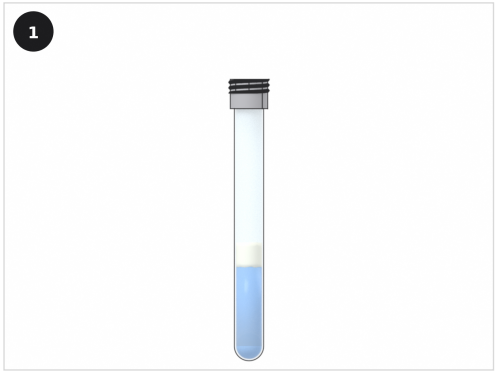

10 Never: sun, heat, shaking, solvents, outdoor release. Not a toy: small parts.

To clean when empty: lukewarm water, a drop of washing-up liquid, soft cloth. Air dry.

Replace the test tube

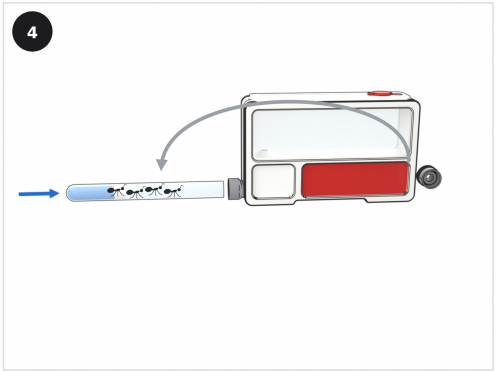

1 Prepare a replacement tube first: water, cotton wool, adapter.

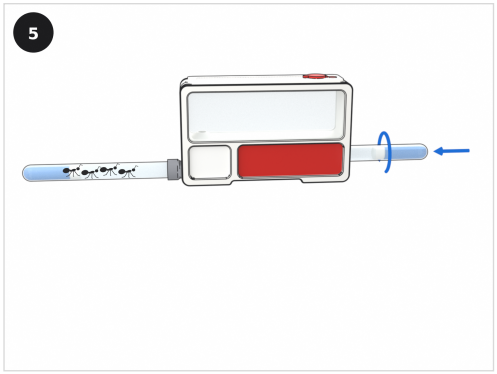

2 Turn the knob to CLOSE.

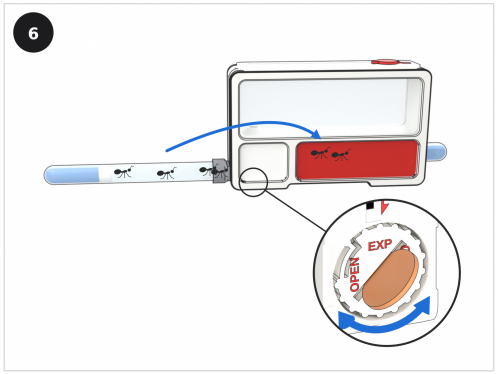

3 Push the sawtooth adapter into the sawtooth socket.

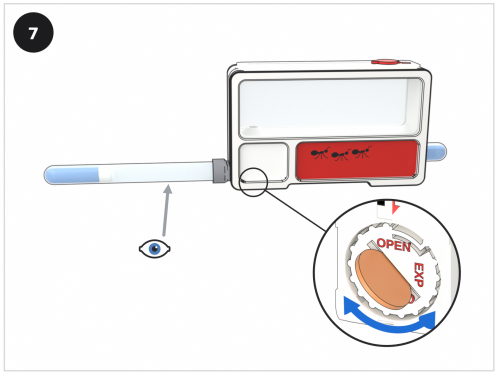

4 Unscrew the old tube. Push it into the sawtooth adapter.

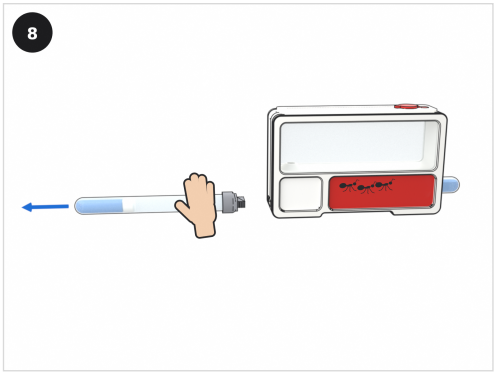

5 Screw in the replacement tube, gently.

6 Turn the knob to EXP. The ants move into the new tube.

7 When the old tube is empty, turn the knob to OPEN.

8 Pull out the sawtooth adapter and the old tube.
